INDUSTRIAL EXPERIENCE

Taichi Graphics, Remote

June. 2022 – Sep. 2022

Compiler R&D Intern (Graphics/Compiler/C++/Python)

Focusing on IR optimizations for [Taichi Language](#), including:

- Refactoring and implementing local matrices for Frontend and CHI IR of Taichi Language
- Extending IR optimizations (e.g. **dead code elimination**) to support the new matrix operations
- Enabling large matrices and optimizations (e.g. **SIMD**) for matrix operations
- Conducting experiments on performance gains; implementing fallback strategies to avoid performance regression on backends that do not support SIMD

Intel Labs, Hillsboro, OR

Mar. 2022 – June. 2022

Formal Verification Research Intern (Formal Methods/Python/Dafny)

Developed the **Pyrope** framework for **correct-by-construction** hardware modeling.

- Enabled **proof-driven development** purely in Python
- Encoded the correctness proof of (multi-)montgomery reduction algorithm in Python and verified successfully by compiling to Dafny
- Unified “sources of truth” for correctness proofs and hardware model implementations
